

IDEAS FOR SAVINGS

All we know are savings.

ENERGY PROGRESS LIGHTING

As one of the oldest LED lighting efficiency service companies in the U.S., Energy Progress Lighting (EPL) utilizes design-build and performance-based systems to deliver energy and maintenance savings and significant operations upgrades to existing facilities. EPL also provides build, own, operate and maintain (BOOM) services for solar energy systems. EPL's efficiency services group offers a full suite of sustainable design consulting services, including energy auditing, commissioning and retro-commissioning, energy & daylighting analysis, LEED® certification consulting, and sustainability master planning.

What makes EPL unique is our ability to engineer and implement turnkey energy solutions that meet each customer's individual needs. At EPL, we pride ourselves on the excellent relationships we maintain with our customers. We earn their trust and respect through listening and timely response to their needs and concerns. These relationships, along with our quality workmanship and reliability is what makes EPL one of the longest running companies in lighting technology.

Free Energy Audit & Cost Estimates

Call EPL to schedule your free audit. We will provide you with an energy and cost savings summary.

State and Utility Incentives

Your business may be eligible for state and local incentives. Now is the opportunity to lower your electric bill at only a fraction of the cost with government subsidized incentives.

Free Sampling

Customer satisfaction first - we can install a sample light to test for your business so you can see the LED difference in person.

Average ROI 18 to 24 Mo.

Return on Investment for our clients average between 18 to 24 months. Your upgrade investment is quickly paid back by your savings.

LEDs are a semi-permanent investment

No ballasts required - a huge service and maintenance cost reduction.

Fast ROI to pay back project costs with savings.

Increase visibility for a better work and sales environment

CUSTOMER TESTIMONIALS

DAVID
HOLLY HILL MALL

"EPL had a wide range of fixtures to fit all our needs. Not only were their products good but their crew was too. The techs were skilled and friendly and got the job done without interruptions."

ERIC
SAMSUNG ELECTRONICS

"We have a lot of moving components and departments in our building but EPL finished our project without any issues. They gave us more customized solutions than the other companies and we're now saving more than initially expected."
